They're here. The next level in bilevel therapy

AirCurve[®]11
VAUTO

AirCurve[®]11
ASV

The new ResMed AirCurve 11 VAuto and AirCurve 11 ASV* bilevel devices combine the trusted algorithms used in AirCurve 10 devices with ResMed Air11™ features.

For patients who need bilevel therapy, the path to a better quality of life can be challenging. That's why AirCurve 11 features tools to help them start and acclimate to therapy. From Personal Therapy Assistant in myAir to an enhanced version of Care Check-In designed specifically for bilevel users and available via myAir or on the device, find out how AirCurve 11 can support them.†

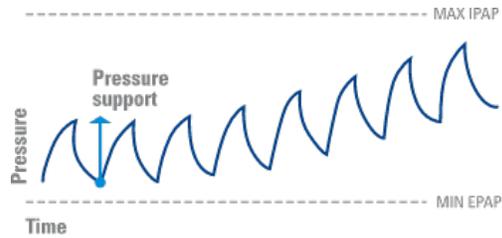

A majority of surveyed patients who set up AirSense 11 said they felt confident that they could use Personal Therapy Assistant.†

Get details

AirCurve 11 VAuto

For patients with obstructive sleep apnea (OSA) and non-compliant OSA.

AirCurve 11 ASV*

For patients with central sleep apnea (CSA), obstructive sleep apnea, mixed apneas or periodic breathing.

* ASV therapy is contraindicated in patients with chronic, symptomatic heart failure (NYHA 2-4) with reduced left ventricular ejection fraction (LVEF \leq 45%) and moderate to severe predominant central sleep apnea.

See why more sleep physicians trust ResMed PAP therapy solutions to improve patient quality of life than solutions from other sleep brands.²

Take me there

* ASV therapy is contraindicated in patients with chronic, symptomatic heart failure (NYHA 2-4) with reduced left ventricular ejection fraction (LVEF \leq 45%) and moderate to severe predominant central sleep apnea.

† Some features of myAir are only available in the myAir app and with Air11 devices.

¹ ResMed market research survey results of US AirSense 11 PAP device users. AirSense 11 is part of the Air11 platform. Survey conducted July 2021. n=78.

² ResMed study of board certified sleep physicians in the U.S. aware of ResMed. Study conducted August 12 - September 6, 2022. n=87.
